

Impact Analysis: from 2023 Annual Stewardship Report

✦ Across **160 communities** in El Salvador, Guatemala, Honduras, and Mexico, 339 trained volunteers tended to the health and wellbeing of **4,827 children** and **1,245 pregnant women**, conducting **55,680 home visits**.

✦ Over **32,000 nutritious meals** were served to vulnerable families and children. These meals were organized and prepared by our volunteers and often served in their homes.

✦ In Honduras, **310 high-quality water filters** were distributed for use among **1,240 families** suffering extreme potable-water insecurity. Each family received training on how to use and properly maintain the filters.

✦ In Guatemala, **120 new community-serving chicken coops** were established, providing a sustainable source of food, encouraging collaboration, and helping disrupt the cycle of dependency.

✦ Volunteers distributed **652,800 packets** of child nutritional supplements, **14,400 bags** of rice and soy, and **336,000 units** of maternal vitamins for expectant mothers, totaling **1M+ supplements**.

✦ In Honduras, **11 pilot tilapia micro-fisheries** were established in **5 communities**.

✦ **100% of children ages 0 to 6 months** were fed exclusively with their mothers' breastmilk. This amazing achievement was to a large degree the result of the counseling efforts of Hope for a Healthier Humanity volunteers.

✦ Volunteers ensured that **100% of program beneficiary children** received their necessary vaccinations, and we assisted local clinics with donations of medicines, equipment, and supplies.

✦ Essential **antibiotics, vitamins, and other medicines valued at \$3,677,001** were shipped to El Salvador and Honduras.
